

Net Control Manager

<https://net-control.us/>

W0KCN has a net every Tuesday evening on 146.79 (PL Tone 107.2) at 7:00pm. We would love to have you log in to the net on your rig each Tuesday. You will also have the opportunity to open Net Control Manager and follow along as check-ins are taken by the Primary Net Control Operator and logged by a second operator.

When you open the URL <https://net-control.us/> you will see a screen like this:

You will want to click on the dropdown here. The nets that are active will be in **green** text. Click on the one for W0KCN to join us and follow along, while you listen on 146.79.

This will help acquaint you with the procedures that we follow.

W0KCN Weekly Net is a controlled net, meaning that all communications are directed by and go through the Net Control Operator and are logged by the Log Manager.

You will be able to see who these hams are as they will be listed at the top of the Net Log.

Here is an example of what this will look like:

CALL OR FIRST NAME
